

DARIA

TEMPORAL REVERSAL DEVICE

USER MANUAL

Revision 1.0 / Unit 01 of 01

BUILT EXCLUSIVELY FOR DARIA

IMPORTANT: This device is intended for controlled age-reversal operations only. Do not use while emotionally attached to a specific year, texting an ex, or underestimating the consequences of becoming 20 again.

01 / Before You Begin

Congratulations. Against all reasonable engineering advice, your Temporal Reversal Device is operational.

The DARIA unit was designed to reverse the user's biological temporal position while preserving current memories, personality, and - whenever possible - dignity.

What's in the box

#	COMPONENT	NOTES
01	DARIA Temporal Reversal Unit	Primary temporal hardware
02	Temporal Cell	Pre-calibrated; do not open
03	User Manual	You are reading it. Good start.
04	Certificate of Creation	Serial No. 0001
05	Engineer Support	Powered primarily by Coke Zero + pad thai

Early-stage assembly: Project DARIA V0.1.

02 / Quick Start

The unit is shipped in **SAFE / PRESENT-DAY MODE**. Complete the following sequence before attempting reversal.

1. POWER

Press and hold the crown for 3 seconds. Wait until the core emits a steady amber glow.

2. SELECT TARGET AGE

Rotate the crown until the display shows the desired biological age. Recommended test value: 20.

3. CONFIRM

Press the crown once. The device will ask for confirmation because apparently this is necessary.

4. STABILIZE

Remain still for 30-120 seconds while the Temporal Flux Stabilizer locks onto the current timeline.

5. TRAVEL

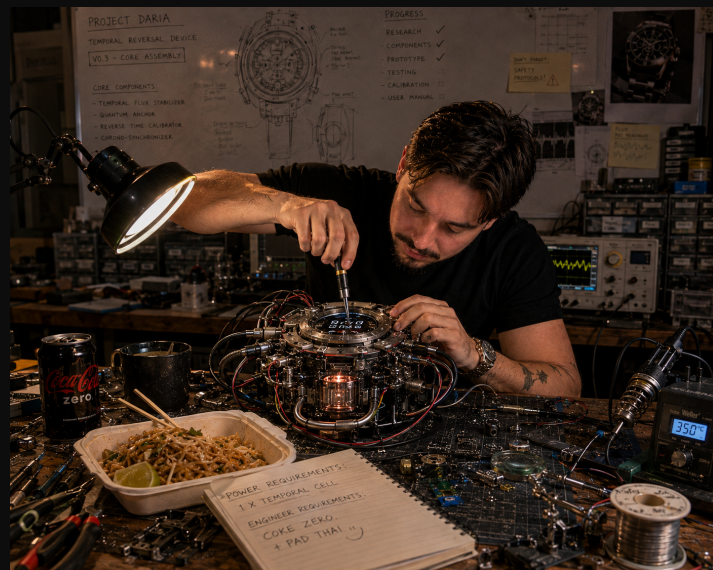

Press and hold until the countdown begins. Do not remove the device, panic, or change your mind halfway through.

EXPECTED DISPLAY

TARGET AGE: 20

STATUS: READY

GRANDMOTHER MODE: DISABLED

03 / Selecting a Target Age

Age selection is precise to approximately +/- 11 minutes, assuming the universe cooperates.

For your first reversal, **20** is the factory-recommended target. The device will automatically calculate the temporal offset from your present age and verify that the destination timeline remains accessible.

Grandmother Mode(TM)

Grandmother Mode is an emergency protection layer triggered when the device detects excessive chronological drama. It may also activate after repeated statements such as "I'm not 20 anymore."

GRANDMOTHER MODE DISABLED

Normal operation. Cane assistance not required.

Do not attempt to disable safety interlocks manually. The engineer already spent enough time on this.

04 / Safety & Paradox Warnings

WARNING - TEMPORAL OPERATIONS ARE INHERENTLY STUPID.

Proceed anyway only after reading this page.

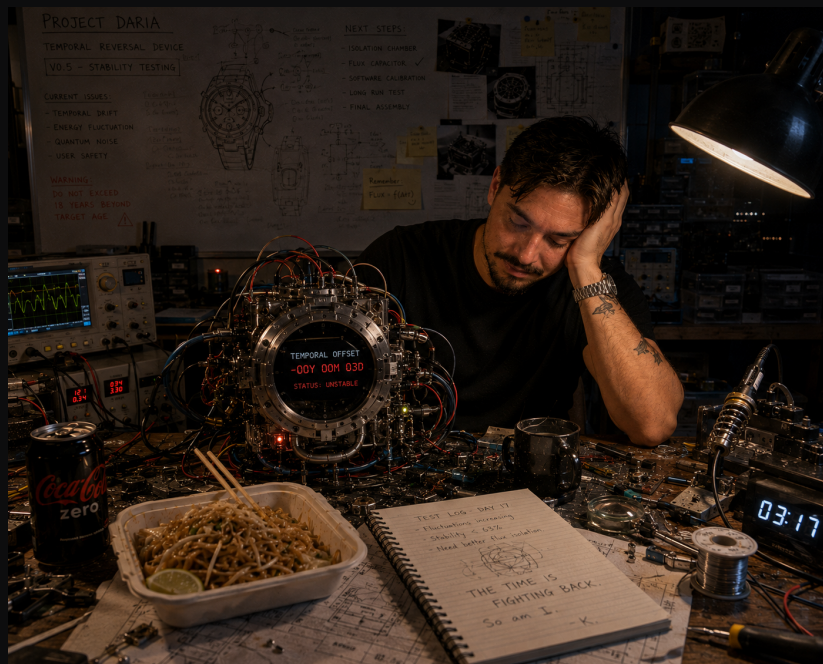

- **Do not reverse below age 18.** The unit will reject the request and judge you silently.
- **Do not attempt to meet your past self.** This creates paperwork.
- **Do not buy Bitcoin.** The device is for personal rejuvenation, not insider temporal trading.
- **Do not text an ex from the destination year.** Memory retention does not imply emotional immunity.
- **Do not exceed one major reversal per 24 hours.** Side effects may include deja vu, calendar confusion, and aggressively youthful optimism.
- **Never open the Temporal Cell.** There are no user-serviceable parts inside, only consequences.

If the display reads **STATUS: UNSTABLE**, stop immediately and proceed to Troubleshooting.

05 / Troubleshooting

DISPLAY	CAUSE	ACTION
STATUS: UNSTABLE	Temporal flux has not locked.	Place device on a stable surface, wait 60 seconds, retry calibration.
TEMPORAL DRIFT	Target age fluctuates.	Stop touching the crown. Seriously.
QUANTUM NOISE	Core interference detected.	Move away from microwaves, cheap chargers, and existential crises.
DEVICE WON'T START	Temporal Cell depleted.	Contact the engineer. Do not use a normal USB-C charger.
GRANDMOTHER MODE ENABLED	Protective protocol activated.	Sit down, drink water, and stop saying you're old.

Stability testing, 03:17. Engineer morale: questionable.

06 / Care, Charging & Storage

Treat the DARIA unit as precision equipment, not jewelry - despite the fact that it looks considerably better than most jewelry.

Cleaning

Use a dry microfiber cloth on external metal and glass surfaces. Never immerse the unit, expose it to steam, or clean the Temporal Cell with alcohol.

Storage

Return the unit to its fitted case after use. Store between 15°C and 25°C, away from magnets, direct sunlight, and people who ask too many questions.

Power requirements

DEVICE: 1 x Temporal Cell

ENGINEER: Coke Zero + Pad Thai

07 / Certificate & Final Notes

Serial No. **0001**

Production: **01 / 01**

Owner: **DARIA**

Resale status: **NOT FOR RESALE**

Grandmother certification: **DENIED**

BUILT EXCLUSIVELY FOR DARIA.

You asked for a way to reverse time. It took longer than expected, required questionable amounts of caffeine, and nearly broke causality - but it's ready.

Please use it responsibly.

- K.
